19" RSV8 RACK Cabinets with height

21U, 24U, 27U, 33U

19" RSV8 RACK cabinets with their 800 mm width, allow for the accommodation of a larger amount of equipment and increased space for cooling/air circulation. The following equipment can be housed in 19-inch rack cabinets: servers, network equipment, telecommunications equipment, UPS systems, audio and video equipment, etc. They provide the possibility of mounting additional accessories such as: shelves, fan brackets, cable brackets, rails, masks, patch panels, etc.

Explanation of product label

Features of the 19" RSV8 RACK cabinet:

Manufactured from cold-rolled DC-01 steel sheet with a thickness of 1.5 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint.

Knock-out rectangular holes are located on the roof and bottom of the cabinet and are used for cable entry and ventilation.

The standard door position on RACK cabinets is on the right. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 5 mm thick tempered glass.

The lock is with a key cylinder EK333. It can be replaced with another lock type upon request.

The back side of the cabinet can be with a removable back panel or doors. **Side panels** of the cabinet are removable. **The cabinet bottom** is equipped with adjustable feet and a modular plinth can be provided upon request. **The cabinet's load capacity** with even distribution depends on its height:

- 21U, 24U, and 27U can support up to **300 kg**
- 33U can support up to **400 kg**

Four rack supporting profiles are included with the cabinet, along with additional equipment (two rack supporting profile brackets, two side bars and four spacer boxes).

All internal elements are galvanized.

The tables show examples of cabinets with a back panel (B), in RAL 9005 (9).

The back of the cabinet can be replaced with doors: (F - solid, V - perforated, G - with glass).

19" RSV8 RACK Cabinets with height

42U, 45U

19" RSV8 RACK cabinets with their 800 mm width and 42U and 45U heights, enable more efficient use of vertical space and are used for housing, protecting and organizing electronic and communication equipment in larger and more complex installations. They are suitable for data centers, large network installations, etc. They provide the possibility of mounting a greater number of additional accessories such as: shelves, fan brackets, cable brackets, rails, masks, patch panels, etc.

*Number of openings on one side (roof or bottom)

Features of the 19" RSV8 RACK cabinet:

Manufactured from cold-rolled DC-01 steel sheet with a thickness of 1.5 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint.

Knock-out rectangular holes are located on the roof and bottom of the cabinet and are used for cable entry and ventilation.

For cabinets with heights of 42U and 45U, side panels, back panel and door are ordered individually according to the cabinet type.

The standard door position on RACK cabinets is on the right. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. **The lock** is with a key cylinder EK333. It can be replaced with another lock type upon request.

The cabinet bottom is equipped with adjustable feet and a modular plinth can be provided upon request. Cabinets with a load capacity of 1600 kg are always delivered with a plinth. The plinth is 100 mm high and can be solid or perforated for ventilation.

The cabinet's load capacity with even distribution is: 600, 1000 and 1600 kg.

Four RACK supporting profiles are included with the cabinet, along with additional equipment (two RACK supporting profile brackets, side bars and spacer boxes; depending on the load capacity). All internal elements are galvanized.

Explanation of product label

RSV8 45U 2 F 9

Width: 800 mm Height: 45 (U) Double door Door type: **F** solid door, **V** perforated door, **G** door with glass

RAL cabinet color: **7** RAL7035, **9** RAL9005

When ordering, you choose the base of the cabinet, without doors and side panels, and then select the appropriate side and back panels, doors and modular plinth according to your needs. This ordering method offers great flexibility in accordance with the user's requirements.

19" RSV6 RACK Cabinets with height

21U - 33U

19" REK ormani tipa RSV6 with a width of 600 mm provide several advantages compared to wider cabinets, especially for smaller or more compact installations. Some of the advantages include space-saving and cost-effectiveness in cases where equipment installation and cabling are less complex. They provide enough space for storing equipment such as: network devices, servers, telecommunications equipment and additional accessories (shelves, brackets, patch panels, etc.).

Features of 19" REK RSV6 cabinets:

They are made of cold rolled DC-01 steel sheet with a thickness of 1.5 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint.

Knock-out rectangular holes are located on the roof and bottom of the cabinet and are used for cable entry and ventilation. The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors.
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 5 mm thick tempered glass.

The lock is with a key cylinder EK333. It can be replaced with another lock type upon request.

The **back side** of the cabinet can be with a removable back panel or doors. **Side panels** of the cabinet are removable. The cabinet **bottom** is equipped with adjustable feet and a modular plinth can be provided upon request.

The cabinet's **load capacity** with even distribution depends on its height:

- 21U, 24U and 27U can support up to **300 kg**
- 33U can support up to **400 kg**

Four **RACK supporting profiles** are supplied with the cabinet along with side bars. All internal elements are galvanized.

In the tables, examples of product labels in RAL9005 (9) are listed. By changing the numerical label to (7), RAL7035 is ordered.

19" RSV6 RACK Cabinets with height

42U, 45U

The 19" RSV6 type RACK cabinets, with a width of 600 mm and heights of 42U and 45U, provide vertical space optimization, compactness and have greater capacity for installations compared to cabinets up to 42U. Improved air circulation and heat distribution enhance energy efficiency and reduce the need for additional cooling. They are suitable for servers, networks and additional equipment (shelves, brackets, patch panels, etc.).

600 x 1200 mm	450x357 (1pc), 450x90 (2 pcs)

*Number of openings on one side (roof or bottom)

Features of 19" REK RSV6 cabinets:

They are made of cold-rolled DC-01 steel sheet with a thickness of 1.5 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint.

Knock-out rectangular holes are located on the roof and bottom of the cabinet and are used for cable entry and ventilation.

For cabinets with heights of 42U and 45U, **side panels, back panel and doors** are ordered individually according to the cabinet type.

The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors.
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 5 mm thick tempered glass.

The lock is with a key cylinder EK333. It can be replaced with another lock type upon request. **The cabinet bottom** is equipped with adjustable feet and a modular plinth can be provided upon request. The plinth is 100 mm high and can be solid or perforated for ventilation. The cabinet's **load capacity** with even distribution is 600 and 1000 kg.

Four **RACK supporting profiles** are included with the cabinet, along with additional equipment (two RACK supporting profile brackets and side bars, depending on the load capacity).

All internal elements are galvanized.

Explanation of product label

RSV6 45U 2 F 9

Width: 600 mm Height: 45 (U) Double door Door type: **F** solid door, **V** perforated door, **G** door with glass

RAL cabinet color: **7** RAL7035, **9** RAL9005

When ordering, you choose the base of the cabinet, without doors and side panels, and then select the appropriate side and back panels, doors and modular plinth according to your needs. This ordering method offers great flexibility in accordance with the user's requirements.

19" RNV RACK Cabinets

RNV

19" RNV RACK cabinets, with their width of 600 mm and height from 6U to 24U, can be an optimal choice for smaller and medium installations that require efficient use of space and flexibility. The smaller dimensions of RNV RACK cabinets enable wall-mounting, which saves space and facilitates access to cables and equipment. The following equipment can be housed in 19-inch RNV RACK cabinets: smaller servers, network switches and routers, UPS systems, computer units, etc. They provide the ability of mounting additional equipment such as: shelves, fan brackets, cable brackets, rails, masks, patch panels, etc.

Explanation of product label

Features of 19" RNV REK ormana:

They are made of cold-rolled DC-01 steel sheet with a thickness of 1 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint.

The top and bottom of the cabinet have knock-out rectangular holes for cable entry and round holes for fan mounting with the provided perforation. On the side edges of the top and bottom, there are ventilation openings.

The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 5 mm thick tempered glass.

The lock is a standard "T" key (EK-T). It can be replaced with another lock type upon request. **The back side** of the cabinet has openings for wall mounting and a removable back panel with a lock. **The side panels** of the cabinet are removable, with locks. **The load capacity** of the cabinet with even distribution depends on its height:

- 6U and 9U up to **30 kg**
- 12U, 15U, 18U, 21U and 24U up to **40 kg**

Cabinets with a depth of 450 mm are delivered with two, while cabinets with a depth of 500 and 600 mm come with **four galvanized RACK supporting profiles**.

19" RNVD RACK Cabinets

RNVD

19" RNVD RACK cabinets, with a width of 600 mm and a height of 6U to 24U, feature a rotation add-on that is mounted on the back of the cabinet. This feature allows the cabinet to rotate up to 100°, making it easier to access equipment from the back. Equipment such as: smaller servers, network switches and routers, UPS systems and computer units can be stored in the 19-inch RNVD RACK cabinets. They provide the ability to mount additional equipment such as shelves, fan brackets, cable brackets, rails, masks, patch panels, etc.

Explanation of product label

Features of 19" RNVD RACK cabinet:

They are made of cold-rolled DC-01 steel sheet with a thickness of 1 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint. **The top and bottom** of the cabinet have knock-out rectangular holes for cable entry and round holes for fan mounting with the provided perforation. On the side edges of the top and bottom, there are ventilation openings.

The add-on has designated openings for wall mounting as well as knock-out rectangular holes for cable entry on the top and bottom. The dimension of the add-on is 100 mm.

The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 4 mm thick tempered glass.

The lock is a standard "T" key (EK-T). It can be replaced with another lock type upon request. **The side panels** of the cabinet are removable, with locks. **The load capacity** of the cabinet with even distribution depends on its height:

- 6U and 9U up to **35 kg**
- 12U, 15U, 18U, 21U and 24U up to **25 kg**

Cabinets with a depth of 450 mm are delivered with two, while cabinets with a depth of 500 and 600 mm come with **four galvanized RACK supporting profiles**.

19" RKL RACK Cabinets

RKL

19" RKL type RACK cabinets, with their width of 600 mm and height of 6U to 18U, can be an optimal choice for small and medium installations that require efficient use of space and flexibility. The smaller dimensions of the RKL RACK cabinets enable wall mounting and the fixed side panels provide additional strength and stability to the cabinet structure. The following equipment can be accommodated in 19-inch RKL RACK cabinets: small servers, network switches and routers, UPS systems, computer units, etc. They offer the ability of mounting additional equipment such as: shelves, fan holders, cable holders, rails, masks, patch panels, etc.

Explanation of product label

Features of 19" RKL RACK cabinets:

They are made of cold-rolled DC-01 steel sheet with a thickness of 1 mm. Protection degree is **IP30**. The protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint. **The top and bottom** of the cabinet have knock-out rectangular holes for cable entry and round holes for fan mounting with the provided perforation. On the side edges of the top and bottom, there are ventilation openings.

The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other.

The doors are located on the right side of the cabinet. The design allows for easy change of the cabinet door position allowing the door to be easily moved from one side to the other. There are three door models:

- Solid doors
- Perforated doors, with 70% of the door surface featuring 5x5 mm perforations.
- Glass doors, with 4 mm thick tempered glass.

The lock is a standard "T" key (EK-T). It can be replaced with another lock type upon request. **The back** of the cabinet is fixed and has openings for wall mounting. **The side panels** of the cabinet are fixed. **The load capacity** of the cabinet with even distribution depends on its height:

- 6U and 9U up to **25 kg**
- 12U, 15U and 18U up to **35 kg**

Cabinets with a depth of 450 mm are delivered with two, while cabinets with a depth of 500 and 600 mm come with **four galvanized RACK supporting profiles**.

Openings for:	Opening dimensions (mm, pcs)
Cable entry	125 x 50 mm (2 pcs)
Fan	Mounting holes Ø2.5 (4 pcs) Ventilation perforation dimensions 120 x 120 mm

**Openings on one side (top or bottom)*

In the tables, examples of product labels in RAL9005 (9) are listed. By changing the numerical label to (7), RAL7035 is ordered.

19" and 10" RKL 4/2N(U) RACK Cabinets

RKL 4/2N (U)

19" and 10" RKL 4/2 RACK cabinets represent practical solutions for housing and organizing telecommunications, network, internet, intercom and video surveillance equipment in residential buildings. RKL 4/2 cabinets are produced in two variants:

19" and 10" RKL 4/2U in-wall REK cabinets

The door with a mask is made of HV DC-01 steel sheet with a thickness of 1 mm, protected by electrostatic plasticization with a smooth RAL 9016 paint, while the cabinet housing is made of 1 mm thick galvanized sheet metal.

View of the **RKL 4/2U** cabinet

19" and 10" RKL 4/2N on-wall REK cabinets

Made of high-quality HV steel sheet DC-01 with a thickness of 1 mm, protected by electrostatic plasticization with a smooth RAL 9016 paint.

View of the **RKL 4/2NH** cabinet

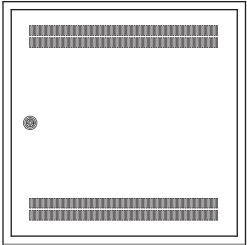

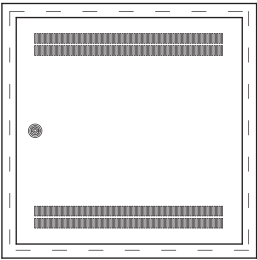

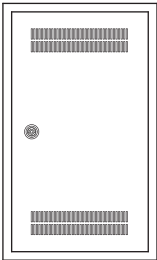

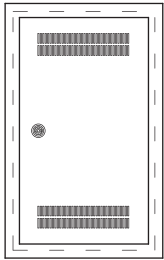

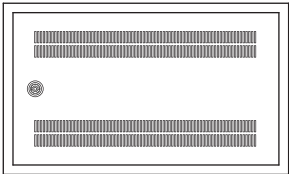

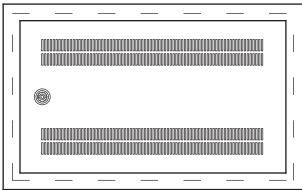

RKL 4/2 cabinets include the following components:

- **Two 4U supporting profiles** intended for mounting equipment up to 80 mm deep, such as: patch panels, optical splitters, cable organizers, smaller PoE injectors, etc. The profiles provide flexibility and easy adaptation to various user requirements and needs.
- **Two 2U supporting profiles** intended for mounting equipment up to 230 mm deep, such as: network switches, PoE injectors, video recorders, active devices for wireless communication (WiFi), network storage devices (NAS), VoIP equipment and other larger-depth devices that require additional space for mounting and cabling. These profiles enable optimal use of space within the cabinet and better organization of equipment.

The top, bottom and back side of the cabinet have knock-out rectangular holes dimensions 50 x 50 mm, which facilitates cable routing and organization.

The cabinet doors are perforated in the upper and lower zone for better ventilation and maintaining an optimal temperature inside the cabinet.

Types of labels: (**N** - on-wall, **U** - in-wall, **H** - horizontal orientation).

19" X2 DOR - 2 Post Open Rack

X2 DOR

2 Post open racks (X2 DOR) are used for mounting network and telecommunications equipment, such as: switches, patch panels, routers, keystone connectors, etc. They are suitable for smaller rooms, telecommunications rooms, network cabinets, etc. The open construction of the racks allows for easy access to equipment, making maintenance and component updates easier.

2 Post open racks are made of high-quality steel sheet with a thickness of 2 mm for the housing and 3 mm for the base. Galvanized zinc plating is used to protect the rack and base from corrosion. There are anchoring holes on the base.

Racks are available in heights of **42U** and **47U** and can be connected to each other using hinges, allowing for flexibility in connecting multiple racks together. This system has a load-bearing capacity with even distribution of up to **300 kg**, making it ideal for organizing and securing lighter and shallower equipment.

Product Label	A	B	C	D	E	F

DOR47U	2163	2328	450	1100	150	550

Dimensions are in mm

19" COR - 4 Post Open Rack

COR

4 Post Open racks (COR) are used for mounting heavier and deeper equipment, such as servers: UPS systems, NAS devices, KVM switches, switches, etc. They are suitable for larger rooms, data centers, server rooms and the like. **The four vertical supporting posts** allow for mounting equipment from the front and rear, providing additional stability and support for heavier components. The open construction of the racks allows for easy access to equipment.

They are made of high-quality steel sheet with a thickness of 2.5 mm for the housing and 3 mm for the base. Galvanized zinc plating is used to protect the rack and base from corrosion. There are anchoring holes on the base.

They are available in heights of **42U** and **47U**. This system has a load-bearing capacity with even distribution of up to **1000 kg**, making it ideal for organizing and securing heavier and deeper equipment.

Fan Holder (page 28)

Used for cabinet ventilation. Can accommodate 2, 4 or 6 fans.

Covers (page 31)

Used to close designated openings on the top and bottom of the cabinet. Made in two sizes, for openings:

- 450 x 90mm
- 450 x 357mm

Spooler (page 31)

Used for storing reserve or excess optical cables.

Sides of modular plinth (pages 8 and 13)

Part of the modular plinth assembly. Can be solid or with ventilation openings.

Copper Grounding Bar (page 29)

Used for grounding installed equipment. Consists of:

- a copper bar 12x5mm,
- 4 insulators M6x30mm,
- 12 clamps.

19-inch Masks (page 28)

Used to cover free space in the cabinet. Produced in heights from 1U to 10U.

42U Vertical Cable Manager (page 28)

Used for vertically organizing (stacking) cables. Features locking doors.

19" 1U Cable Manager Panel (page 30)

The 19" cable manager panel is a horizontal cable channel with a locking cover function.

19-inch Cable Manager Panel (page 28)

Used for horizontal cable organization (stacking).

Cable holder for angled patch panel (page 28)

Used for organizing (stacking) cables using plastic ties.

Angled 19-inch patch panel (page 29)

Angled with 24 modules – empty.

19-inch Patch panel (page 30)

For 24 modules (empty).

Shelves (pages 26 and 27)

Can be fixed or sliding, with mounting at two or four points. Load capacities from 8 to 50 kg.

Foam cable entry plates (page 31)

Foam cable entry plates are used for cable entry into the cabinet and are equipped with a foam structure sealing rubber for dust protection.

Fixed shelf

PU

The fixed mounting shelf with support at two points is made of DC-01 HV steel sheet with a thickness of 1.5 mm. The shelf protection is achieved by electrostatic plasticization with RAL 9005 or RAL 7035 structural paint

Cable brackets for patch panels

Drawing	Description	Product Label
	The 19" patch panel cable bracket allows for neat cable organization in combination with a patch panel. By using plastic ties, cables are securely fastened to the bracket, achieving optimal organization and cable security.	NKPP24PR
	The 19" angled patch panel cable bracket allows for neat cable organization in combination with an angled patch panel. By using plastic ties, cables are securely fastened to the bracket, achieving optimal organization and cable security.	NKUPP24PR

Fan bracket

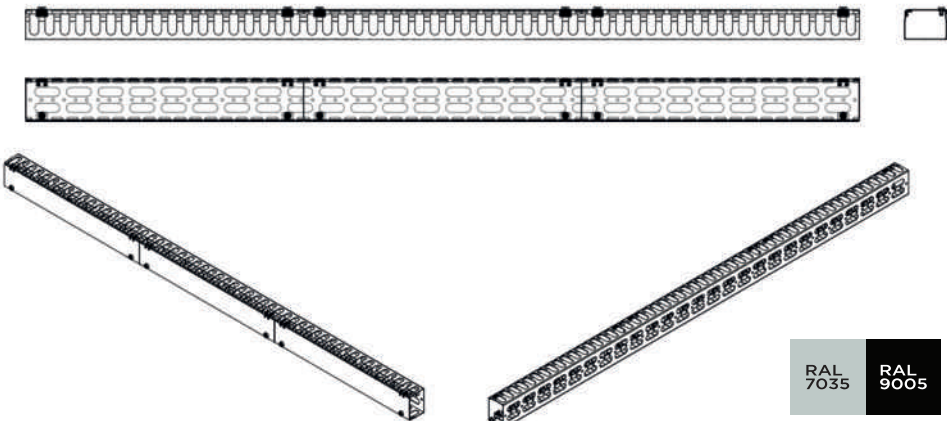

VPKxVT

Drawing	Description	Product Label
	The fan bracket for a 450 x 357 mm opening, equipped with two 120 x 120 mm fans and a thermostat, provides efficient cabinet cooling.	VPK2VT9
	The fan bracket for a 450 x 357 mm opening, equipped with four 120 x 120 mm fans and a thermostat, provides efficient cabinet cooling.	VPK4VT9
	The fan bracket for a 450 x 357 mm opening, equipped with six 120 x 120 mm fans and a thermostat, provides efficient cabinet cooling.	VPK6VT9

The table shows examples of product labels in RAL9005 (9), which can be changed to RAL7035 by modifying the numerical code to (7).

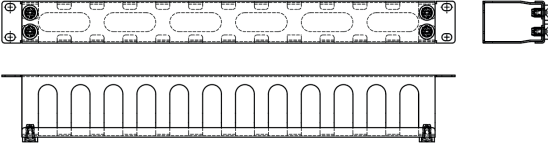

42U Vertical Cable Manager

NK42U

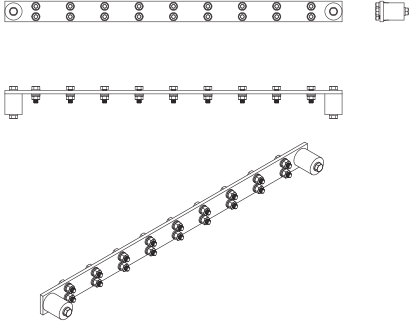

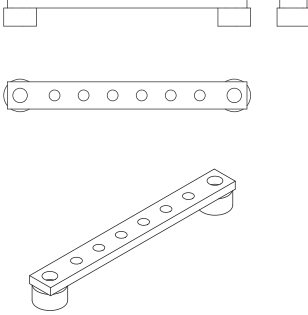

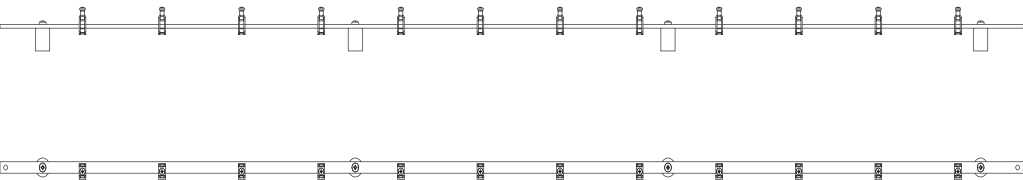

Drawing	Product Label
	NK42U9
	Description: The vertical cable manager 42U height is delivered in pairs and offers an efficient solution for cable organization. It is equipped with a lockable cover, providing additional security and protection for cables.

The table shows examples of product labels in RAL9005 (9), which can be changed to RAL7035 by modifying the numerical code to (7).

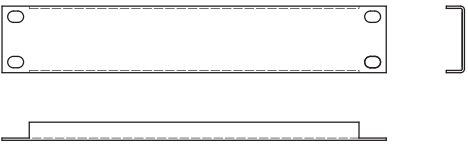

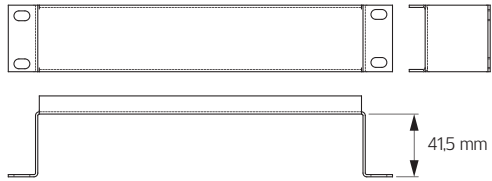

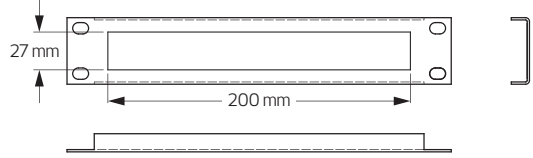

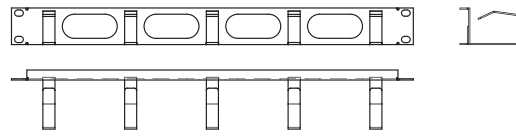

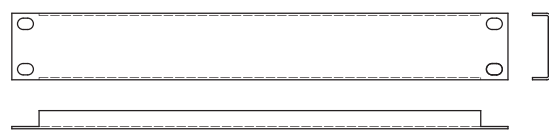

Horizontal Cable Manager

Drawing	Description	Product Label
	<p>The 19" cable manager panel is a horizontal cable channel, with a lockable cover. It provides the possibility of organizing cables and protects cables from excessive stress and damage.</p>	<p>PR19IN9</p>

Grounding systems

	<p>The 19" copper grounding bar is installed on the support profiles of REK, from the front or back side. It is used in RSV cabinets and others, which have a 19" grid.</p>	<p>ŠU19IN</p>
	<p>The small copper grounding bar is mounted at the bottom of the cabinet on copper-plated, exploded M6 x 25 mm screws. It is used in RKL, RNV and RNVD cabinets.</p>	<p>U06URKL</p>
	<p>The 42U grounding rail is used for grounding installed equipment. It consists of a copper rail 12 x 5 mm, 4 insulators M6 x 30 mm and 12 clamps.</p>	<p>U42URSV</p>

Masks

Drawing		Description	Product Label							
		The 10" protective mask is an addition for RACK cabinets, designed to cover gaps and improve aesthetics and organization. The mask protects cables and limits unauthorized access to hardware. Delivered with a set for installation.	P-1Ux10IN9							
		The 10" dropped mask is an addition to RACK cabinets that provides the possibility of mounting necessary equipment on itself. Delivered with a set for installation.	P-1Ux10IN-S409							
		The 10" mask with a hole for cable passage. The mask protects cables and limits unauthorized access to hardware. Delivered with a set for installation.	P-1Ux10IN-R19							
		The 1U cable manager mask is mounted on 18-inch grid rails and is used to organize cables through 5 metal rings. This mask facilitates maintenance, prevents cable tangling and comes with a set for installation.	PR19INA9							
		The 19" protective mask is an addition for rack cabinets, designed to cover gaps and improve aesthetics and organization. The mask protects cables and limits unauthorized access to hardware. Delivered with a set for installation.	P-XU9
